Scale: 1/4 mile or a 5 minute walk

Try this

How many does it take to get from your home to your school?

Ok, now calculate how many miles is your school from your home? How long of a walk is that?

Remember that **4x** your finger measurement equals a mile; like this: 1 2 3 4

How far is the closest Park to your home?

What about the closest Rec Center?

...Or how about the closest Library?

Minneapolis Walking Routes for Youth are the easiest way to and from schools, parks, libraries and other neighborhood destinations.

The Neighborhood Walking Routes can be bike friendly for children, while Busy Walking Routes are not. More information about biking in the city can be found on the Minneapolis Bike Map. Pick up a copy at your local library. Kids, always ask a parent before riding in the street.
