Subject: MPRB District 4

The Bryn Mawr Neighborhood Association has been active in monitoring and addressing the neighborhood's interests and concerns with respect to city redistricting. We are pleased to see that preliminary drafts retain all of Bryn Mawr as a contiguous entity in Ward 7.

Likewise, does the change in Park District 4 with a small exception. We noted a minor change in our Park District boundary where the separation on the north end was changed from a line following Bassett Creek to one which (we think) follows a rail line. The creek line is what divides Bryn Mawr and Harrison neighborhoods. And it's the basis for longstanding joint work in planning for the Bassett Creek Valley re-development. We are hopeful you would support a restoration of the boundary to its original position at the creek. It is a small sliver of property but one which Bryn Mawr residents use regularly. We would greatly appreciate retention of this small area in District 4 so that the MPRB district border coincides with the neighborhood boundary and Bryn Mawr's park interests are addressed under a single park district.

Could you please help us by clarifying if this boundary was changed as it appears to be on the pre/post maps? Thank you,

Marlin Possehl
