## **Minneapolis Green Homes North Overview**

The City of Minneapolis through its Community Planning and Economic Development (CPED) department is accepting applications for the Green Homes North Program. The program funds will assist developers with development gap financing for new construction. Green Homes North is funded by the Minnesota Housing Finance Agency, the City of Minneapolis and the Family Housing Fund, with 2-3% loans available from the Twin Cities Community Land Bank.

The City of Minneapolis has identified four goals for Green Homes North:

- Build 100 green homes in North Minneapolis
- Increase energy efficiency and sustainability
- Create job opportunities for local residents and minority and women-owned businesses
- Promote Minneapolis businesses providing green building products and services

Proposals that minimize the use of the subsidy and provide the highest standards of quality design, energy efficiency and overall sustainability will be prioritized in the selection process.

The Minneapolis Green Homes North Green Product & Service Directory has been developed to assist developers with:

- Use of locally sourced green building products
- Knowledge of green products
- Collaborative relationships with green product companies and service providers
