AN AFFIRMATIVE ACTION EMPLOYER

ADDENDUM NO. 1

“BIDS FOR PEDESTRIAN SIGNAL FACES WITH COUNTDOWN TIMERS”

Specification change: Section 5 / Letter D. / No. 7 should be removed.

5. Specification for Pedestrian Signal Faces with Countdown Timers - Polycarbonate:

D. Optical Unit

1. Module shall be constructed for installation within the signal housing assembly without any modification to either the housing assembly or the LED module.
2. Each unit shall be labeled with the manufacturers trademark, identification number, date of manufacture, voltage rating and up arrow indication.
3. Insulation displacement connectors shall not be used.
4. Under no circumstances shall a “Walk” indication supersede a “Don’t Walk” indication when any amount of voltage is applied to both inputs.
5. The LED unit shall include a one piece neoprene or EPDM (Ethylene, Propylene, Diene Monomers) gasket which shall make an assembled housing and LED module watertight.
6. A.C. or D.C. voltages at input terminals of the L.E.D. shall be below 15 volts within 200ms after removing power. The indication shall work with a conflict monitor utilizing N.E.M.A. plus functions, specifically DUAL INDICATION.
- ~~7. Each module shall have one opening located in each of the four corners to secure the module to the housing assembly door.~~

This addendum should be acknowledged on your bid form.
