

Nokomis Elevation (msl) 2018

- 2018 Lake Nokomis elevations from Marth through November 14,2018.
- The April snowstorm and ~5-inch rain in early September are peaks.
- During most of August and early September, the lake was below the elevation where water could flow out through the weir structure.
- When the lake is below the outlet elevation, water leaves the lake through evaporation and through groundwater movement.
