

18TH AVE S BRIDGE OVER MIDTOWN GREENWAY

Improving the condition of the bridge and providing safe connections for all

Project background

Constructed in 1916, the 18th Ave S bridge over the Midtown Greenway is planned to be improved with design and construction planned over the next few years. Motor vehicle use over the bridge has been restricted to a single lane and the bridge was load-posed to 26 tons in February of 2024, due to structural concerns. It remains open for pedestrians and bicyclists.

The bridge is located within the Railroad Grade Separation Historic District and is recognized as an important connection for the community as it supports access over and to the Midtown Greenway and businesses on Lake Street. The project will engage with many stakeholders, including the Lake Street Council, Midtown Greenway Coalition, and Four Sisters Urban Farm.

Our Goals

**SAFER
CONDITIONS
FOR
WALKING
AND ROLLING**

**IMPROVED
ROUTES FOR
BIKING AND
ROLLING**

**MORE WAYS
TO GET
AROUND
FOR
EVERYONE**

**INCREASED
FOOT AND
BICYCLE
TRAFFIC
FOR LOCAL
BUSINESSES**

Existing conditions

CURRENT

Reduced vehicular lane and load posting

CURRENT

Deteriorating concrete and reinforcing on bridge underside

Transportation Action Plan

This project is aligned with the Transportation Action Plan, the city's vision for safer, greener and more modern streets that serve all people and all the ways they want to get around.
